The Royal College of Psychiatrists of Thailand

Foreword

In 2020, the Board of Training and Examination in Rehabilitation Medicine (TERM) under the Royal College of Psychiatrists of Thailand (RCPhysiatrT) published the book entitled “Entrustable Professional Activities (EPAs) and Workplace-based Assessment (WPBA) for Residency Training in Rehabilitation Medicine in Thailand”.

After being used in the academic year of 2021, feedbacks were compiled from staff and trainees of all nine training institutes. Currently, the 2022 revised version is now available for implementation for the academic year 2022.

On behalf of the Royal College of Psychiatrists of Thailand, I would like to express my sincere thanks to the EPAs and WPBA working group and the Board of TERM for their time and efforts on revising the book of EPAs and WPBA.

Clinical Professor Kamontip Harnphadungkit, MD, FRCPhysiatrT
President, the Royal College of Psychiatrists of Thailand

17th June 2022

Preface

For a year that the EPAs and the WPBA 2021 have been implemented by all training institutes. The EPAs and WPBA Working Group set up a questionnaire aiming to evaluate implementation, success, and feedbacks for further improvement. All WPBA forms have been used extensively and are useful for evaluating the outcomes of all 13 EPAs.

The EPAs and WPBA working group looked through all comments and suggestion, it has been agreed to maintain all 13 EPAs and WPBAs with some minor changes in contents, and 6 forms of WPBA for evaluating residents' achievement in all 6 professional competencies: 1) patient care, 2) medical knowledge and practical skills, 3) interpersonal and communicational skills, 4) practice based learning and improvement, 5) professionalism, and 6) system-based practice.

For this occasion, I would like to acknowledge the EPAs and WPBA Working Group for devoting their times and efforts in making the EPAs and WPBA in Rehabilitation Medicine Residency Training in Thailand, 2022 revision ready for implementation in 2022 Academic Year.

EPA 1: Evaluating and Managing Pain

	Prerequisite	Milestones			Expected Outcomes & Competencies	
		M 1	M2	M 3	Details	Codes
Knowledge	<ul style="list-style-type: none"> Review physiology and pathophysiology of acute and chronic pain, <i>e.g. somatic, visceral, nociceptive, neuropathic pain.</i> Review biomechanic and ergonomics. 	<ul style="list-style-type: none"> Describe common causes of MSK pain conditions, <i>e.g. MPS, arthritic pain, tendinopathy including related biomechanics, ergonomics and consequences of MSK pain.</i> 	<ul style="list-style-type: none"> Describe neuropathic pain, <i>e.g. radicular pain, central pain, nerve injury, CRPS</i>; consequences and complications of pain. Describe CBT for treatment of pain, and behavior modification. 	<ul style="list-style-type: none"> Describe uncommon/complex pain conditions, <i>e.g. fibromyalgia, chronic pain, cancer pain, sport injury</i>; consequences and complications; surgical/anesthetic interventions, and CAM, <i>e.g. acupuncture.</i> 	<ul style="list-style-type: none"> Describe different types and causes of pain, related factors (predisposing, perpetuating and precipitating factors), consequences and complications. Describe EBM of pharmacological and non-pharmacological treatments including surgical/anesthetic interventions, and CAM for pain management. 	MKS
Evaluation & Diagnosis	<ul style="list-style-type: none"> Review pain assessment in MSK pain and imaging, <i>e.g. x-ray, US, CT etc. of MSK conditions.</i> 	<ul style="list-style-type: none"> Make a correct diagnosis of common MSK pain. Identify consequences and related factors of MSK pain. 	<ul style="list-style-type: none"> Comprehensively assess bio-psycho-social aspects affecting pain and functioning. Correlate EDx, MRI spine, spinal cord and brain findings for diagnosis of neuropathic pain. 	<ul style="list-style-type: none"> Evaluate complex pain with more specific assessment tools. Correlate imaging, US, bone scan findings for diagnosis of complex pain. 	<ul style="list-style-type: none"> Make a correct diagnosis of cause of pain, and identify related factors, consequences and complications. Select appropriate and safe investigations for proper diagnosis Provide accurate prognosis. 	PC MKS
Rehabilitation & Management	<ul style="list-style-type: none"> Review pharmacological and non-pharmacological management. Review various diagnoses of causes of pain based on ICD-10. Review principles of ethical decision making. 	<ul style="list-style-type: none"> Prescribe appropriate pharmacological and non-pharmacological treatments, <i>e.g. physical modalities, therapeutic exercises.</i> Perform trigger point (TrP) injection/dry needling. Provide adequate patient education. 	<ul style="list-style-type: none"> Manage with interdisciplinary and comprehensive approach including CBT and behavioral modification. Provide proper patient education, planning and goal setting. Perform intra-articular/soft tissue injection with/without US-guide with safety precaution. 	<ul style="list-style-type: none"> Perform proper counseling or referral for pain control with other therapy, <i>e.g. epidural/intra-thecal nerve block, CAM</i>, with concern of EBM, safety and cost-effectiveness. Manage based on medical ethical decision making (see WPBA – CbD). 	<ul style="list-style-type: none"> Demonstrate appropriate, comprehensive and interdisciplinary rehabilitation management and counseling based on ethical decision making, safety, and cost-effective. Provide an appropriate referral to other specialists for pain control. 	PC MKS ICS PF SBP
Workplace-based Assessment (WPBA)		<p>mini-CEX: 1 case of MSK pain</p> <p>DOPS: 1 case of dry needling or TrP injection</p>	<p>mini-CEX: 1 case of neuropathic pain</p> <p>DOPS: 1 case for Intra-articular or soft tissue injection</p>	<p>CbD: 1 case of cancer pain, chronic pain, sports injury, or fibromyalgia</p>	<p>Summary of WPBA</p> <ul style="list-style-type: none"> mini-CEX: 2 cases DOPS: 2 cases CbD: 1 case 	PLI

Note: CAM, complementary and alternative medicine; CBT, cognitive behavioral therapy; CRPS, complex regional pain syndrome; CT, computer tomography; EBM, evidence-based medicine; EDx, electrodiagnosis; ICD, International Statistical Classification of Diseases and Related Health Problems; MPS, myofascial pain syndrome; MRI, magnetic resonance imaging; MSK, musculoskeletal; US, ultrasonography

EPA 2: Evaluating and Managing Brain Disorders

	Prerequisite	Milestones			Expected Outcomes & Competencies	
		M 1	M 2	M 3	Details	Codes
Knowledge	<ul style="list-style-type: none"> Review neuroanatomy, neurophysiology and neuropathology of stroke, TBI, dementia, Parkinson, brain tumor; and risk factors of stroke. 	<ul style="list-style-type: none"> Describe stroke and its consequences, <i>e.g. weakness, impaired sensation, activity limitation</i>, and common complications 	<ul style="list-style-type: none"> Describe spasticity, cognitive impairment, emotional disturbance, dysphagia, dysphasia, incontinence. Describe concept of neuroplasticity. 	<ul style="list-style-type: none"> Describe dementia, Parkinson; cognitive & perceptual dysfunction, behavioral & psychosocial problems; and other consequences, <i>e.g. abnormal movements, gait pattern</i> 	<ul style="list-style-type: none"> Describe common brain disorders such as stroke, Parkinson, dementia, TBI; related problems, <i>e.g. impairments, disability, complications</i>; stroke risk factors; and prognostic factors. 	MKS
Evaluation & Diagnosis	<ul style="list-style-type: none"> Review neurological examination and interpretation of NIHSS score. Review ICD-10 and ICF related with brain disorders. 	<ul style="list-style-type: none"> Assess stroke with following measures, <i>e.g. Brunnstrom motor recovery scale, TMSE, Barthel ADL index</i>. Interpret CT and MRI brain findings. 	<ul style="list-style-type: none"> Assess spasticity and dysfunctions with the followings: MAS, MoCA, Rancho Los Amigos scale, PHQ9, MRS, FAC, Gait speed, etc. Screen and assess dysphagia and dysphasia 	<ul style="list-style-type: none"> Assess cognitive, perceptual, behavioral and psychosocial problems. Assess abnormal movements. 	<ul style="list-style-type: none"> Perform special tests to assess severity of related impairments, <i>e.g. NMS, cognitive perceptual, communication dysfunctions</i>. Obtain a complete problem based on ICF framework. Interpret CT and MRI brain findings and provide accurate prognosis. 	PC MKS
Rehabilitation & Management	<ul style="list-style-type: none"> Review medications for brain disorders and co-morbidity. Review mobility, ADL and concepts of medical rehabilitation. Review non-technical skills, <i>e.g. patient education, ethical decision making, communication skills</i>. 	<ul style="list-style-type: none"> Provide adequate rehabilitation management information to patients and families. Set appropriate short- and long-term goals, follow-up and referral. Prescribe appropriate therapy, orthoses, and mobility aids. Complete medical records. 	<ul style="list-style-type: none"> Make a right decision for further rehabilitation investigation and treatment. Provide adequate information to get informed consent. Perform chemo-neurolysis (See EPA 6 Spasticity). Manage patients with dysphagia, dysphasia 	<ul style="list-style-type: none"> Describe non-invasive brain stimulations (tDCS, TMS), music therapy, etc. appropriately. Manage/make a referral for cognitive and behavioral disturbance, psychosocial problem appropriately. Manage perceptual dysfunctions appropriately. 	<ul style="list-style-type: none"> Set appropriate goals, treatments, and rehabilitation program and counseling. Demonstrate rehabilitation management with an interdisciplinary approach. 	PC MKS ICS PF SBP
Workplace-based Assessment (WPBA)		mini-CEX: 1 case of uncomplicated stroke MDR: 3 cases	mini-CEX: 1 case of complicated stroke or TBI MDR: 2 cases	CbD: 1 case of dementia or Parkinson	Summary of WPBA <ul style="list-style-type: none"> mini-CEX: 2 cases CbD: 1 case MDR: 5 cases 	PLI

Note: ADL, activities of daily living; CT, computer tomography; FAC, functional ambulatory category; ICD, ICD International Statistical Classification of Diseases and Related Health Problems; ICF, International Classification of Functioning, Disability and Health; MAS, modified Ashworth scale; MoCA, Montreal cognitive assessment; MRI, magnetic resonance imaging; MRS, modified Rankin scale; NMS, neuromusculoskeletal; NIHSS, National Institute of Health Stroke Scale; PHQ9, patient health questionnaire 9; TBI, traumatic brain injury; tDCS, transcranial direct current stimulation; rTMS, repetitive transcranial magnetic stimulation; TMSE, Thai mental state examination

EPA 3: Evaluating and Managing Traumatic and Non-traumatic Spinal Cord Injury (SCI)

	Prerequisite	Milestones			Expected Outcomes & Competencies	
		M 1	M 2	M 3	Details	Codes
Knowledge	<ul style="list-style-type: none"> Review neuro-anatomy, -physiology and -pathology of TSCI, spine injuries and common NTSCI. 	<ul style="list-style-type: none"> Describe spinal injuries, TSCI, consequence/complications, e.g. weakness, AD, DVT, postural hypotension, PrU, depression, pain (see EPA1). 	<ul style="list-style-type: none"> Describe NTSCI, e.g. NMO, MS; tuberculosis; MMC, tumors, vascular disorders, myelopathy. Describe spasticity, NLUTD and NBoD and related complications. 	<ul style="list-style-type: none"> Describe chronic or complicated problems, e.g. HO, osteoporotic fracture; sexual dysfunction, post-traumatic syringomyelia, suicidal idea. 	<ul style="list-style-type: none"> Describe TSCI and common NTSCI including related consequences and complications in details. 	MKS
Evaluation & Diagnosis	<ul style="list-style-type: none"> Review neurological exam based on ISNCSCI. Review ICF framework, and tools of assessing ADL. 	<ul style="list-style-type: none"> Perform neurological exam based on ISNCSCI. Diagnose secondary conditions in post-acute rehabilitation phase. Identify impairments and disability based on ICF and SCIM-V3. 	<ul style="list-style-type: none"> Assess spasticity, NLUTD and NBoD. Perform single-channel cystometry. Interpret UDT findings correctly. Write cystometry/UDT reports correctly and adequately. 	<ul style="list-style-type: none"> Assess to identify psychosocial problems, QoL, patient/family's needs & expectation, and environmental barriers Identify needs for surgery, advanced therapy & assistive technology. 	<ul style="list-style-type: none"> Make correct diagnoses of TSCI/ NTSCI, and of secondary conditions. Identify rehab problems including psychosocial problems based on ICF, SCIM-V3, QoL, need assessment, etc. Perform cystometry and complete UDT reports with correct findings and appropriate comments/suggestions for management. 	PC MKS
Rehabilitation & Management	<ul style="list-style-type: none"> Review conventional rehabilitation therapy, mobility aid and assistive devices. Review techniques of patient education, & counseling. Review ICD-10 and ICD-9CM. Review legislations on persons with disability. 	<ul style="list-style-type: none"> Set SMART goals & plans for rehabilitation, and provide patient & family education. Make an ethical decision for therapy/treatment, assistive device & mobility aid. Monitor, present and discuss medical and rehabilitation progress of <u>TSCI</u> cases with team at rehabilitation conference (see EPA12). Prevent, early detect, and treat complications. Complete medical record. 	<ul style="list-style-type: none"> Treat spasticity (see EPA6). Manage NLUTD and NBoD appropriately. Monitor, present and discuss medical and rehabilitation progress of <u>NTSCI</u> cases with team at rehabilitation conference (see EPA12). Write appropriate rehabilitation consultation reports and referral letters to other specialists when necessary. 	<ul style="list-style-type: none"> Prescribe high specification assistive devices, mobility aids to increase independency. Co-ordinate with other specialty /organization to solve complicated/ chronic problems. Provide patient & family counseling to enhance disability acceptance and have right coping strategy and attitude, self-efficacy. 	<ul style="list-style-type: none"> Set appropriate goals and plans for patients with TSCI/NTSCI in post-acute & chronic phases. Conduct a holistic interdisciplinary team approach and comprehensive rehabilitation management based ethical decision making (see EPA 12). Provide adequate and appropriate patient & family education and counseling; and assistive devices. Complete correct and complete medical records according to ICD-10 and ICD9-CM. 	PC MKS ICS PF SBP
Workplace-based Assessment (WPBA)		<p>mini-CEX: 1 case of neuro exam in TSCI</p> <p>MDR: 2 cases of IPD/consulted TSCI</p>	<p>DOPS: 1 case of cystometry</p> <p>MDR:1 case of UDT, 2 cases of IPD/consulted NTSCI</p>	<p>CbD: 1 case of complicated SCI</p>	<p>Summary of WPBA</p> <ul style="list-style-type: none"> mini-CEX: 1 case DOPS: 1case CbD: 1 case MDR: 5 cases 	PLI

Note: AD, autonomic dysreflexia; ADL, activities of daily living; DVT, deep vein thrombosis; EBM, evidence-based medicine; HO, heterotopic ossification; ICD, ICD International Statistical Classification of Diseases and Related Health Problems; ICF; international classification of functioning, disability and health; ISNCSCI, International standards neurological classification for SCI; MMC, meningomyelocele; MS, multiple sclerosis; NMO, neuromyelitis optica; NBoD, neurogenic bowel dysfunction; NLUTD, neurogenic lower urinary tract dysfunction; NTSCI, non-traumatic SCI; PrU, pressure ulcer; QoL, quality of life; SCI, spinal cord injury; SCIM-V3, spinal cord independence measure-V3; SMART, specific, measurable, achievable, relevant, timely; TSCI, traumatic SCI; UDT, urodynamic test

EPA 4: Evaluating and Managing Pediatric Rehabilitation

	Prerequisite	Milestones			Expected Outcomes & Competencies	
		M 1	M 2	M 3	Details	Codes
Knowledge	<ul style="list-style-type: none"> Review normal growth & developmental milestones; primitive reflexes, and postural reactions. 	<ul style="list-style-type: none"> Review pathophysiology of CP and delayed development. 	<ul style="list-style-type: none"> Describe consequences of birth injury - brachial plexus palsy; spina bifida (meningomyelocele); scoliosis, and complicated CP with complications, e.g. hip dislocation, severe spasticity. 	<ul style="list-style-type: none"> Describe NMDs, e.g. congenital limb deficiency, arthrogryposis multiplex congenita; lower limb deformity, rotational deformity; DDH; common genetic disorders; learning disorders and behavioral problems. 	<ul style="list-style-type: none"> Describe growth & developmental milestones, primitive reflexes, postural reactions; and pathophysiology of pediatric diseases/disorders. 	MKS
Evaluation & Diagnosis	<ul style="list-style-type: none"> Review assessment of pediatric diseases/disorders. Pediatric. Review pediatric neurological and orthopedic examination. 	<ul style="list-style-type: none"> Perform primitive reflexes, postural reactions, developmental milestones assessment; pediatric neurological and orthopedic examination to diagnose CP, its consequences and complications. 	<ul style="list-style-type: none"> Demonstrate clinical reasoning in diagnosis of the above-mentioned diseases/disorders. 	<ul style="list-style-type: none"> Demonstrate clinical reasoning in diagnosis of the above-mentioned disorders in children. 	<ul style="list-style-type: none"> Perform pediatric diseases/disorders evaluation for correct diagnosis. Identify rehabilitation and related problems including impairments and disability. Select appropriate and safe investigations. Provide accurate prognosis. 	PC MKS
Rehabilitation & Management	<ul style="list-style-type: none"> Review principles of rehabilitation management, goal setting and counseling. Review ICD-10 and ICD-9CM related to CP and other pediatric disease/disorders. Review healthcare and referral system. 	<ul style="list-style-type: none"> Describe impairments, (SMART) goals and rehabilitation program. Provide adequate counseling for parents. Re-assess development milestones, consequences and complications of CP. Complete medical records of pediatric patients with CP. 	<ul style="list-style-type: none"> Demonstrate clinical reasoning in goal setting and treatment planning of the above-mentioned diseases/disorders. Provide proper management for spasticity (see EPA 6). Write rehabilitation consultation reports and referral letters to other specialists when necessary. 	<ul style="list-style-type: none"> Demonstrate clinical reasoning in goal setting and treatment planning for the above-mentioned diseases/disorders based on different needs and health insurances. Provide adequate and appropriate patient & parent education and counseling. Prescribe an appropriate assistive device & mobility aid, orthosis (see EPA 9), and prosthesis (see EPA 8). 	<ul style="list-style-type: none"> Set SMART goals and proper rehabilitation management with a holistic interdisciplinary team approach. Provide adequate and appropriate patient & parent education and counseling. Summarize correct and complete a discharge summary and a referral letter. Prescribe an appropriate orthosis, prosthesis, assistive device & mobility aid based on different needs and health insurances. 	PC MKS ICS PLI PF SBP

Note: CP, cerebral palsy; DDH, developmental dysplasia of the hip; Hx, history taking; ICD International Statistical Classification of Diseases and Related Health Problems; NMD, neuromuscular disorders; PE, physical examination; SMART, specific, measurable, achievable, relevant, timely

EPA 5: Evaluating and Managing Cardiovascular and Pulmonary Rehabilitation

	Prerequisite	Milestones			Expected Outcomes & Competencies	
		M 1 Pulmonary diseases	M 2 Vascular/lymphatic diseases	M 3 Cardiac diseases	Details	Codes
Knowledge	<ul style="list-style-type: none"> Review anatomy and physiology of CVS, lymphatic and pulmonary systems. 	<ul style="list-style-type: none"> Describe pathophysiology of pneumonia, lung abscess, pulmonary TB, restrictive lung & COPD. 	<ul style="list-style-type: none"> Describe pathophysiology of peripheral arterial disease (PAD), DVT, PE; and lymphedema. 	<ul style="list-style-type: none"> Describe pathophysiology of CAD, arrhythmia, heart failure, cardiomyopathy and MI, PCI, CABG. 	<ul style="list-style-type: none"> Describe pathophysiology of common cardiopulmonary diseases, <i>e.g.</i> CAD, COPD. 	MKS
Evaluation & Diagnosis	<ul style="list-style-type: none"> Review peripheral vascular diseases, and tests for DVT, PE and pulmonary disorders; laboratory test and CXR; NYHAFC and ECG. 	<ul style="list-style-type: none"> Diagnose pulmonary diseases with clinical presentation, pulmonary function test, laboratory tests, and CXR. 	<ul style="list-style-type: none"> Diagnose arterial occlusion; venous insufficiency, DVT, PE and lymphedema with non-invasive tests, <i>e.g.</i> ABI, US compression test. 	<ul style="list-style-type: none"> Assess CVS according to NYHAFC, ECG and 6MWT to identify potential candidates and contra-indications to cardiac rehabilitation. Perform and interpret exercise testing before, during, after exercise in patients with cardiovascular and/or pulmonary diseases. 	<ul style="list-style-type: none"> Diagnose cardiovascular & pulmonary diseases and provide accurate prognosis. Prescribe appropriate and non-invasive investigations to confirm diagnosis and assess severity. Identify potential candidates for cardiac rehabilitation program. 	PC MKS
Rehabilitation & Management	<ul style="list-style-type: none"> Review cardiovascular treatments, <i>e.g.</i> cardiovascular drugs, CABG, PCI, and advanced cardiac life support. Review pre- and post-operative pulmonary problems. Review risks factors modification and airway clearance techniques. 	<ul style="list-style-type: none"> Provide patient education for modifying risks of pulmonary disease/disorder. Manage airway clearance techniques, <i>e.g.</i> postural drainage, and breathing based on results of relevant investigations. Prescribe safe endurance exercises for COPD patients. 	<ul style="list-style-type: none"> Prescribe prophylaxis and treatment of DVT, PE and lymphedema. Provide patient education for preventing ulceration and gangrene, and aggravation of lymphedema. Prescribe appropriate physical modalities to control/reduce degree of lymphedema. 	<ul style="list-style-type: none"> Provide counseling and patient education and prescribe safe exercise programs and proper monitoring for patients in different phases of cardiac rehabilitation. Write rehabilitation consultation on exercise prescription and referral letters to other specialists when necessary. 	<ul style="list-style-type: none"> Set appropriate goals Provide proper rehabilitation managements of peripheral vascular diseases, lymphedema, pulmonary and cardiovascular diseases. Provide adequate and appropriate patient & family education and counseling. Complete medical records. Demonstrate concern of safety. 	PC MKS ICS PF SBP
Workplace-based Assessment (WPBA)		DOPS: 1 case of postural drainage and breathing exercise	CbD: 1 case of lymphatic disease mini-CEX: 1 case of vascular disease	CbD: 1 case of cardiac disease	Summary of WPBA <ul style="list-style-type: none"> mini-CEX: 1 case DOPS: 1 case CbD: 2 cases 	PLI

Note: 6MWT, 6-minute walk test; ABI, ankle brachial index; CAD, coronary artery disease; CABG, coronary artery by-pass graft; COPD, chronic obstructive pulmonary disease; CVS, cardiovascular system; CXR, chest X-ray; DVT, deep vein thrombosis; ECG, electrocardiogram; NYHAFC, the New York Heart Association's functional classification; PCI, percutaneous coronary intervention; PE, pulmonary embolism; US, ultrasonography

EPA 6: Evaluating and Managing Spasticity

	Prerequisite	Milestones			Expected Outcomes & Competencies	
		M 1	M 2	M 3	Details	Codes
Knowledge	<ul style="list-style-type: none"> Review neurophysiology of muscle tone & pathophysiology of spasticity. 	<ul style="list-style-type: none"> Describe functional anatomy, neuroanatomy and muscle control of gait and hand use. 	<ul style="list-style-type: none"> Describe common types of spasticity seen in stroke, SCI, CP, TBI. 	<ul style="list-style-type: none"> Describe abnormal gait patterns and hand deformity related to spasticity. 	<ul style="list-style-type: none"> Describe causes and consequences of spasticity that need chemical neurolysis. 	MKS
Evaluation & Diagnosis	<ul style="list-style-type: none"> Review physical and neurological examination of extremities. Review normal and abnormal gait due to spasticity. Review treatable causes of spasticity. 	<ul style="list-style-type: none"> Obtain data from secondary sources and limited-reliable physical and neurological examination. Prescribe appropriate investigations to find treatable causes of spasticity. 	<ul style="list-style-type: none"> Obtain important history and specific PE and neurological examination related to spasticity. Perform some special tests for assessing severity of spasticity. 	<ul style="list-style-type: none"> Obtain complete and accurate history, PE and neurological examination related to spasticity. Perform specific tests in spastic limbs related to functional performance, gait patterns and hand use. 	<ul style="list-style-type: none"> Obtain complete and accurate history, PE, neurological examination and specific tests, related to spasticity of upper and lower extremities. 	PC MKS
Rehabilitation & Management	<ul style="list-style-type: none"> Review basic knowledge in pharmacological and non-pharmacological treatment, <i>e.g. physical modalities, exercise, orthoses.</i> Review of stretching exercises of upper and lower extremities. Review anatomy of muscles and nerves of extremities. 	<ul style="list-style-type: none"> Demonstrate stretching exercises and proper positions to reduce spasticity. Prescribe physical modality and antispastic medication and appropriately monitor its efficacy. 	<ul style="list-style-type: none"> Demonstrate clinical reasoning in prescribing rehabilitation program, medication and chemo-neurolysis regarding EBM. Explain indication & contraindication, chemical type & dosage and steps of neurolysis to receive patient's informed consent. Identify anatomical landmarks and perform chemical neurolysis in common muscles, <i>e.g. calf, elbow/wrist flexors</i>, regarding standard precaution. Prescribe an appropriate lower extremity orthosis/splint (see EPA 9). 	<ul style="list-style-type: none"> Choose correct muscles to be treated and explain dosage for neurolysis. Perform chemical neurolysis with appropriate guidance in less common muscles, <i>e.g. hamstring, finger/toe flexors</i>, regarding standard precaution. Manage complications during the procedure appropriately. Prescribe an appropriate upper extremity orthosis/splint (see EPA 9). 	<ul style="list-style-type: none"> Demonstrate clinical reasoning in prescribing rehabilitation program including medication, physical/occupational therapy, exercise, orthosis and chemo-neurolysis. Demonstrate patient informing skill in appropriate manner. Perform accurate chemical neurolysis with appropriate guidance. 	PC MKS ICS PF SBP
Workplace-based Assessment (WPBA)		<p>CbD: 1 common case with spasticity</p>	<p>DOPS: 1 common case of chemo-neurolysis</p>	<p>DOPS: 1 case of chemo-neurolysis using appropriate guidance</p>	<p>Summary of WPBA</p> <ul style="list-style-type: none"> CbD: 1 case DOPS: 2 cases 	PLI

Note: CP, cerebral palsy; EBM, evidence-based medicine; PE, physical examination; SCI, spinal cord injury; TBI, traumatic brain injury

EPA 7: Managing Electrodiagnosis (EDx) and Neuro-muscular Diseases/Disorders (NMDs)

	Prerequisite	Milestones			Expected Outcomes & Competencies		
		M 1	M 2	M 3	Details	Codes	
Knowledge	<ul style="list-style-type: none"> Review anatomy and physiology of neuro-muscular system, pathophysiology of nerve diseases/injury, and common NMDs. 	<ul style="list-style-type: none"> Describe common entrapments of median, ulnar, and peroneal nerves. 	<ul style="list-style-type: none"> Describe plexopathy/injury of brachial plexus and lumbosacral plexus. Describe radiculopathy/injury of cervical, lumbar and sacral nerve roots. 	<ul style="list-style-type: none"> Describe polyneuropathy, myopathy disease, NMJ disease, and anterior horn cell diseases 	<ul style="list-style-type: none"> Describe knowledge about EDx study in peripheral nerve entrapment/injury, radiculopathy, plexopathy and other NMDs. Minimum No. of critical appraisal of research articles		2 articles of observational or systematic review	2 articles of clinical trials	1 article of meta-analysis		
Minimum No. of attending journal club		8 sessions	8 sessions	8 sessions		

Note: ASEAN J Rehabil Med, ASEAN Journal of Rehabilitation Medicine; CRF, case record form; GCP, good clinical practice; EBM, evidence-based medicine; IRB, institute research board; RCPHysiatrT, the Royal College of Physiatrists of Thailand; SoP, standard of operation

Workplace Based Assessment (WPBA)

Workplace Based Assessment (WPBA)

According to the World Federation of Medical Education (WFME) Global Standards for Quality Improvement of Postgraduate Medical Education, the program providers (training institutes) have to *ensure that assessments cover knowledge, skills and attitudes so that the intended educational outcomes are met by the trainees*. So far, traditional assessments such as multiple choices examination for knowledge, objective structured clinical examinations (OSCEs) and long case examination seem not enough to ensure that trainees have attained sufficient specific competence. And, workplace-based assessment (WPBA) has been introduced for *evaluating trainees' performance in real workplace environment and allowing trainers/assessors to provide timely, specific, constructive, and fair feedback* for trainees' improvement. Common tools used for WPBA are direct observation of procedural skills (DOPSs), mini-clinical evaluation exercise (mini-CEX), case-based discussion (CbD), and multisource feedback (MSF).

After two recent brainstorming and discussion sessions, the EPAs and WPBA working group has been able to revise the current WPBA assessment forms of DOPS, mini-CEX, CbD, medical document review (MDR) and MSF (previously called leading team/meeting), for evaluating trainees' performance. Assessors are suggested to use these forms for formative assessment in clinical practice. The DOPS, mini-CEX, CbD and MSF assessment forms should be used in different situations and milestones by different or multiple assessors to evaluate expected outcomes and competencies of each EPA. Besides, minor revisions of the above-mentioned assessment forms. One new assessment form of research critical appraisal (RCA), is now available for EPA 13 – conducting research in rehabilitation medicine. And, the revised MSF assessment form now contains Thai translation. Each training institute is allowed to use this revised one or its own MSF form.

Following are six WPBA assessment forms for:

1. Mini-Clinical Evaluation Exercise (mini-CEX)
2. Direct Observation Procedural Skills (DOPS)
3. Case-based Discussion (CbD)
4. Medical Document Review (MDR)
5. Multi-source feedback (MSF)
6. Research critical appraisal (RCA)

Using WPBA by all training institutes would surely promote trainees learning and ensure trainees' performance and competence according to the Rehabilitation Medicine intended outcomes.

PC	1. Reviewing diagnoses/problems previous lab tests, treatments <i>adequately</i>						
	2. Performing relevant physical/neurological examinations for planning of a procedure/investigation						
	3. Checking indication, contra-indication & precaution						
PF	4. Informing the patient about benefits and risks and asking for informed consent						
MKS	5. Selecting an appropriate procedure						
	6. Setting the equipment properly before starting the procedure						
	7. Selecting correct medication/solution needed for the procedure						
	8. Selecting suitable body part (muscle, nerve, etc.) to be treated/tested						
ICS	9. Informing an assistant how to assist before/during the procedure						
MKS	10. Positioning the patient appropriately before/during the procedure						
	11. Being in a suitable place/position for better performance						
	12. Performing the technique correctly and efficiently						
PC	13. Concerning of safety precaution monitoring vital signs or <i>unwanted event, complication</i> during and after performing the procedure and reacting <i>promptly and correctly</i>						
	14. Informing/warning the patient adequately/regularly during the procedure						
PC	15. Explaining findings/results of the investigation/procedure <i>correctly and adequately</i>						
MKS	16. Making recommendation for management <i>based on ethical decision making</i>						
ICS	17. Informing the patient choices of further treatment/management, including follow-up and/or referral if necessary

Intended Learning Outcomes and Competencies

1. Patient care (PC) หมายถึง การบริหารผู้ป่วย ที่ประกอบด้วย

- ความสามารถใช้ทักษะการซักประวัติ การตรวจร่างกาย การวินิจฉัยแยกโรค การแปลผลตรวจทางห้องปฏิบัติการและภาพถ่ายรังสี เพื่อให้การวินิจฉัยโรคและการรักษาผู้ป่วยได้ถูกต้องเหมาะสมตามมาตรฐานวิชาชีพแพทย์
- ความสามารถประยุกต์ใช้วิทยาการด้านการแพทย์ สังคมวิทยาและจิตวิทยา เพื่อวางแผนการ บำบัดรักษาได้อย่างเหมาะสมปลอดภัยอีกทั้งให้ผู้ป่วยมีสภาพร่างกายจิตใจพร้อม ปราศจากภาวะแทรกซ้อน ที่เป็นอุปสรรคต่อกระบวนการฟื้นฟูสมรรถภาพ

2. Medical knowledge & procedural skills (MKS) หมายถึง ความรู้และทักษะหัตถการเวชกรรม ที่ประกอบด้วย

- การมีความรู้และมีทักษะเฉพาะทางเวชศาสตร์ฟื้นฟูที่ทันสมัย
- การมีความเชี่ยวชาญในการประยุกต์ใช้บัญชีการจำแนกความบกพร่อง ความพิการ และ สุขภาวะขององค์กรอนามัยโลก (International Classification of Functioning, Disability and Health; ICF) เพื่อจำแนกปัญหาและปัจจัยที่เกี่ยวข้อง กำหนดเป้าหมาย วางแผนการฟื้นฟูสมรรถภาพ และแก้ไขปัญหาของผู้ป่วยและคนพิการได้อย่างเหมาะสม เป็นองค์รวม เป็นระบบ มีประสิทธิภาพ และได้ประสิทธิผล
- การมีทักษะการเป็นผู้นำทีมเวชกรรมฟื้นฟู การทำงานแบบสหวิทยาการ (interdisciplinary approach) การให้คำแนะนำ การประเมินเพื่อติดตามผลลัพธ์ตามมาตรฐานวิชาชีพ

3. Interpersonal and communication skills (ICS) หมายถึง ทักษะระหว่างบุคคลและการสื่อสาร ที่ประกอบด้วย

- ความสามารถรับฟัง สรุปปัญหา ให้ข้อมูล และคำปรึกษาแก่ผู้ป่วย คนพิการ และครอบครัว ได้อย่างถูกต้องเหมาะสม แสดงถึงความเมตตา การเคารพการตัดสินใจและศักดิ์ศรีความเป็นมนุษย์ อีกทั้งสามารถกระตุ้นให้ผู้ป่วยและคนพิการตระหนักในสมรรถนะของตนเอง เพื่อนำไปสู่การพัฒนา คุณภาพชีวิต
- ความสามารถนำเสนอข้อมูลผู้ป่วยถ่ายทอดความรู้ ทักษะ และให้คำปรึกษาแก่แพทย์ บุคลากร ในทีมเวชกรรมฟื้นฟู นักศึกษา และบุคลากรอื่น ๆ ที่เกี่ยวข้อง รวมทั้งสามารถอภิปรายปัญหาอย่าง ถูกต้องสมเหตุสมผล
- ความสามารถบันทึกเวชระเบียนได้ตามมาตรฐานทางการแพทย์ และเขียนบทความวิชาการได้
- ความสามารถใช้สื่อโซเชียล หรือสื่อสารณะได้อย่างเหมาะสม มีจริยธรรม และถูกกฎหมาย

4. Practice-based learning and improvement (PLI) หมายถึง การเรียนรู้และการพัฒนาจากฐานการปฏิบัติ ที่ประกอบด้วย

- ความสามารถเพิ่มพูนความรู้ด้านการแพทย์และเวชศาสตร์ฟื้นฟูได้ด้วยตนเอง เพิ่มประสบการณ์จากการปฏิบัติทางคลินิก และวิเคราะห์ข้อบกพร่องและข้อควรพัฒนาด้านความรู้ ทักษะและทัศนคติของตนเองได้
- ความสามารถประยุกต์ใช้หลักฐานจากงานวิจัยเพื่อพัฒนากระบวนการบำบัดรักษา และฟื้นฟู สมรรถภาพผู้ป่วยและคนพิการได้
- ความสามารถออกแบบและดำเนินงานวิจัยทางการแพทย์และสาธารณสุข เพื่อสร้างองค์ความรู้ หรือ นวัตกรรมทางเวชศาสตร์ฟื้นฟูเพื่อแก้ปัญหาผู้ป่วยคนพิการหรือเพื่อพัฒนาระบบบริการเวชกรรมฟื้นฟู

5. Professionalism (PF) หมายถึง ความสามารถในการทำงานตามหลักวิชาชีพนิยม ที่ประกอบด้วย

- การมีคุณธรรม จริยธรรม และทัศนคติอันดีต่อผู้ป่วย คนพิการ ครอบครัว ผู้ร่วมงาน เพื่อนร่วม วิชาชีพและชุมชน
- การมีความสนใจใฝ่รู้เพื่อพัฒนาไปสู่ความเป็นผู้เรียนรู้ต่อเนื่องตลอดชีวิต (continuous professional development) และเพื่อคงไว้ซึ่งมาตรฐานวิชาชีพ
- การมีความรับผิดชอบต่อหน้าที่ คำนึงถึงประโยชน์ส่วนรวม และความต้องการของ ชุมชนและประเทศชาติ

6. Systems-based practice (SBP) หมายถึง การทำเวชปฏิบัติให้สอดคล้องกับระบบสุขภาพ ที่ประกอบด้วย

- ความสามารถปฏิบัติงานได้อย่างเหมาะสมสอดคล้องกับระบบและยุทธศาสตร์สาธารณสุขของประเทศในส่วนที่เกี่ยวข้องกับงานเวชกรรมฟื้นฟู และประยุกต์ใช้ให้เหมาะสมตามสถานการณ์
- ความสามารถร่วมพัฒนาคุณภาพการบำบัดรักษาฟื้นฟูสมรรถภาพรวมทั้งสร้างเสริมสุขภาพ ของผู้ป่วยและคนพิการ
- ความสามารถปฏิบัติงานโดยคำนึงถึงการใช้ทรัพยากรได้อย่างเหมาะสมและมีประสิทธิภาพ
